

S30P400NSL

Workhorse in Washington State 250 Series Sprayer

STANDARD TURBOMIST FEATURES:

- Stainless steel 400 gallon tank with 1” stainless steel mechanical agitation shaft and four 4” stainless steel paddles for positive agitation
- Udor RO160 high volume (43gpm) diaphragm rear mount pump
- Offset pump reduction system, a Turbomist exclusive system
- Adjustable air delivery system with each side adjustable to allow you to target the chemical where needed, a Turbomist exclusive feature
- A full one year parts and labor warranty, 4 times longer than any competitor in the industry
- Standard Teejet electric ball valve controls with electric pressure adjust at the tractor seat standard.
- A all new CV 3 Point turning hitch to get this narrow machine in and out of all rows is an available option
- Step, final filters and ceramic nozzles on the concentrate nozzles available options
- Tank cradling system designed to extend sprayer life, another Turbomist exclusive
- Air quality unparalleled by any of the competition, with tight tolerance on our turbine design, unchanged in our 61 years of production., providing more air with less horsepower and small turbines.
- Another very important standard feature on this unit, and all Turbomist units is the offset nozzle configuration that has our nozzles mounted outside the air stream to provide unobstructed air that actually shears the water to produce smaller droplets with the same nozzles as the competition, giving superior coverage.
- Low drift towers can be added to this unit at any time
